

Name: _____

Student ID # _____

Coral Reef Biology Day 2

Warm-Up: Watch the video and write 3 things we learned yesterday

1.

2.

3.

After the video, are there any questions you still have:

The Great Barrier Reef is _____ the size it was 20 years ago

Why do corals bleach?

Hawaiian Ko'a Card:

Coral #1:

Shape =

Color =

Coral #2:

Shape =

Color =

A reef is _____

Other types of reefs:

1.

2.

3.

Calcification = _____

Ecology = _____

Ecosystem = _____

Biotic & Abiotic things you would find on a coral reef:

Biotic:

- 1.
- 2.
- 3.

Abiotic:

- 1.
- 2.
- 3.

Biodiversity = _____

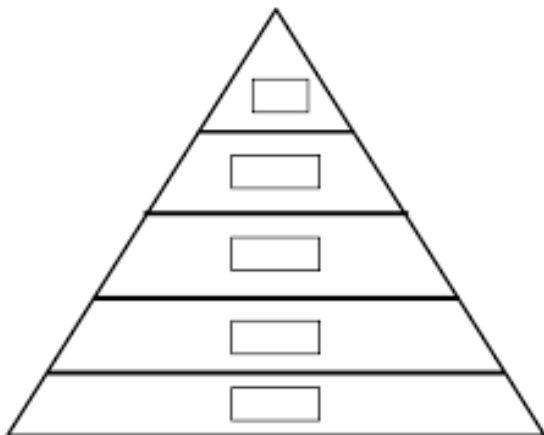

Coral reefs make up less than _____ of the ocean and are home to over _____ of marine life

Coral reefs are known as the _____ of the oceans

Ocean Trophic Structure & Food Webs:

The ocean food web = _____

Essential for _____

Importance of Coral Reefs:

- 1.
- 2.
- 3.
- 4.
- 5.

Ecosystem services = _____

Biogeochemical cycles on Coral Reefs:

- 1.
- 2.

Materials are _____ and _____

Coral Reef Carbon Cycle:

Corals can _____, _____ and _____ carbon in different forms

Carbon sink = _____

What jeopardizes carbon balance on a coral reef? _____

Climate Change Disrupting Carbon Cycle:

- 1.
- 2.
- 3.
- 4.
- 5.
- 6.

Why are coral reefs dying? Write 3 observations!

- 1.
- 2.
- 3.

Land-based Sources of Pollution:

- 1.
- 2.
- 3.

The future of our oceans

- 1.
- 2.
- 3.
- 4.

Ways to Take Action:

- 1.
- 2.
- 3.
- 4.
- 5.
- 6.
- 7.
- 8.

In your opinion, what is the best way to take action and protect our oceans and WHY?
